Question: A state transition diagram with states A , B , and C , and transition probabilities p_1, p_2, \dots, p_7 is shown in the figure (e.g., p_1 denotes the probability of transition from state A to B). For this state diagram, select the statement(s) which is/are universally true

$$p_7 + p_1 + p_4 = 1 \quad (2)$$

$$p_3 + p_2 = 1 \quad (3)$$

$$p_6 + p_5 = 1 \quad (4)$$

From (3) and (4) we have:

$$p_3 + p_2 = p_6 + p_5 \quad (5)$$

\therefore Option (1) and (3) are correct.

Fig. 0. Figure1

- 1) $p_2 + p_3 = p_5 + p_6$
- 2) $p_1 + p_3 = p_4 + p_6$
- 3) $p_1 + p_4 + p_7 = 1$
- 4) $p_2 + p_5 + p_7 = 1$

Solution:

From, the given state diagram we can make a Transition matrix as:

$$M = \begin{pmatrix} p_7 & p_1 & p_4 \\ p_3 & p_2 & 0 \\ p_6 & 0 & p_5 \end{pmatrix} \quad (1)$$

And a valid transition matrix for a Markov Chain, the sum of rows should be 1 which
